COMPREHENSIVE AUDIT REPORT

Website: https://long_findings.example.com
Directory: Long Text Test
Generated: February 06, 2026 at 20:33

TOTAL SCORE
Directory SEO: 59/200 | AI Visibility: 31/100
90/300

Section	Score	Max	Status
Structure & Architecture	15	50	Critical
On-Page SEO	15	50	Critical
Content Quality	11	40	Critical
Technical SEO	9	30	Critical
Authority & Trust	9	30	Critical
AI Visibility	31	100	Critical
TOTAL	90	300	F

Your directory requires urgent attention. Implementing the recommendations in this report could dramatically improve your search visibility and user experience.

EXECUTIVE SUMMARY

Metric	Value
Listing Pages Analyzed	150
Category Pages Analyzed	25
Location Pages Found	10
Sitemap URLs	500
Schema Objects Found	12

PRIORITY FIXES

Categories scoring below 50% that need immediate attention:

- Priority Fix #1: Critical issue requiring immediate attention.
- Priority Fix #2: Critical issue requiring immediate attention.
- Priority Fix #3: Critical issue requiring immediate attention.
- Priority Fix #4: Critical issue requiring immediate attention.
- Priority Fix #5: Critical issue requiring immediate attention.

QUICK WINS

High-impact improvements you can make quickly:

- * Quick Win #1: Implement this quick improvement for immediate results.
- * Quick Win #2: Implement this quick improvement for immediate results.
- * Quick Win #3: Implement this quick improvement for immediate results.
- * Quick Win #4: Implement this quick improvement for immediate results.
- * Quick Win #5: Implement this quick improvement for immediate results.

STRUCTURE & ARCHITECTURE (15/50)

How well your directory is organized - listings, categories, locations, and internal linking.

[3/10] Structure Category 1

Finding #1 for Structure: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #2 for Structure: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #3 for Structure: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #4 for Structure: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #5 for Structure: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Recommendations:

> Recommendation #1: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.

> Recommendation #2: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet

eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.

> Recommendation #3: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.

[3/10] Structure Category 2

Finding #1 for Structure: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #2 for Structure: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #3 for Structure: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #4 for Structure: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #5 for Structure: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Recommendations:

> Recommendation #1: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet

eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.

> Recommendation #2: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.

> Recommendation #3: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.

[3/10] Structure Category 3

Finding #1 for Structure: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #2 for Structure: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #3 for Structure: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #4 for Structure: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #5 for Structure: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Recommendations:

- > Recommendation #1: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.
- > Recommendation #2: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.
- > Recommendation #3: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.

[3/10] Structure Category 4

Finding #1 for Structure: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #2 for Structure: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #3 for Structure: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #4 for Structure: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #5 for Structure: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered

during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Recommendations:

- > Recommendation #1: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.
- > Recommendation #2: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.
- > Recommendation #3: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.

[3/10] Structure Category 5

Finding #1 for Structure: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #2 for Structure: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #3 for Structure: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #4 for Structure: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #5 for Structure: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include

specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Recommendations:

- > Recommendation #1: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.
- > Recommendation #2: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.
- > Recommendation #3: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.

ON-PAGE SEO (15/50)

Title tags, meta descriptions, headings, schema markup, and canonicals.

[3/10] On-Page Category 1

Finding #1 for On-Page: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints.

This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #2 for On-Page: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints.

This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #3 for On-Page: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints.

This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #4 for On-Page: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints.

This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #5 for On-Page: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints.

This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Recommendations:

> Recommendation #1: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.

> Recommendation #2: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.

> Recommendation #3: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness,

AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.

[3/10] On-Page Category 2

Finding #1 for On-Page: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints.

This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #2 for On-Page: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints.

This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #3 for On-Page: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints.

This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #4 for On-Page: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints.

This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #5 for On-Page: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints.

This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Recommendations:

> Recommendation #1: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.

> Recommendation #2: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.

> Recommendation #3: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.

[3/10] On-Page Category 3

Finding #1 for On-Page: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints.

This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Recommendations:

> Recommendation #1: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.

> Recommendation #2: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.

> Recommendation #3: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.

[3/10] On-Page Category 5

Finding #1 for On-Page: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific

metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #2 for On-Page: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #3 for On-Page: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #4 for On-Page: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #5 for On-Page: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Recommendations:

- > Recommendation #1: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.
- > Recommendation #2: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.
- > Recommendation #3: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.

CONTENT QUALITY (11/40)

Listing descriptions, user-generated content, editorial content, and freshness.

[2/10] Content Category 1

Finding #1 for Content: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints.

This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #2 for Content: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints.

This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #3 for Content: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints.

This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #4 for Content: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints.

This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #5 for Content: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints.

This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Recommendations:

> Recommendation #1: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.

> Recommendation #2: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.

> Recommendation #3: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness,

AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.

It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints.

This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #5 for Authority: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints.

This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that

spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Recommendations:

> Recommendation #1: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.

> Recommendation #2: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.

> Recommendation #3: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.

[3/10] Authority Category 3

Finding #1 for Authority: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints.

This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #2 for Authority: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints.

This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #3 for Authority: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints.

This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #4 for Authority: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints.

This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #5 for Authority: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints.

This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the

audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Recommendations:

- > Recommendation #1: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.
- > Recommendation #2: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.
- > Recommendation #3: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.

AI VISIBILITY (31/100)

How well the site is optimized for AI crawlers, LLMs, and AI-powered search engines.

[3/10] AI Visibility Category 1

Finding #1 for AI Visibility: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #2 for AI Visibility: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #3 for AI Visibility: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #4 for AI Visibility: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column

constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #5 for AI Visibility: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Recommendations:

> Recommendation #1: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.

> Recommendation #2: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.

> Recommendation #3: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.

[3/10] AI Visibility Category 2

Finding #1 for AI Visibility: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #2 for AI Visibility: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #3 for AI Visibility: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #4 for AI Visibility: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #5 for AI Visibility: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Recommendations:

> Recommendation #1: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.

> Recommendation #2: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.

> Recommendation #3: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.

[3/10] AI Visibility Category 3

Finding #1 for AI Visibility: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #2 for AI Visibility: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #3 for AI Visibility: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered

during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #4 for AI Visibility: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #5 for AI Visibility: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Recommendations:

> Recommendation #1: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.

> Recommendation #2: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.

> Recommendation #3: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.

[3/10] AI Visibility Category 4

Finding #1 for AI Visibility: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #2 for AI Visibility: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #3 for AI Visibility: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include

specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #4 for AI Visibility: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #5 for AI Visibility: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Recommendations:

> Recommendation #1: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.

> Recommendation #2: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.

> Recommendation #3: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.

[3/10] AI Visibility Category 5

Finding #1 for AI Visibility: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #2 for AI Visibility: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

capabilities.

Finding #3 for AI Visibility: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #4 for AI Visibility: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #5 for AI Visibility: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Recommendations:

> Recommendation #1: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.

> Recommendation #2: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.

> Recommendation #3: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.

[3/10] AI Visibility Category 6

Finding #1 for AI Visibility: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #2 for AI Visibility: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #3 for AI Visibility: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #4 for AI Visibility: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #5 for AI Visibility: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Recommendations:

> Recommendation #1: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.

> Recommendation #2: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.

> Recommendation #3: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.

[3/10] AI Visibility Category 7

Finding #1 for AI Visibility: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #2 for AI Visibility: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #3 for AI Visibility: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #4 for AI Visibility: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #5 for AI Visibility: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Recommendations:

> Recommendation #1: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.

> Recommendation #2: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.

> Recommendation #3: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.

[3/10] AI Visibility Category 8

Finding #1 for AI Visibility: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered

during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #2 for AI Visibility: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #3 for AI Visibility: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #4 for AI Visibility: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #5 for AI Visibility: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Recommendations:

- > Recommendation #1: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.
- > Recommendation #2: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.
- > Recommendation #3: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.

[3/10] AI Visibility Category 9

Finding #1 for AI Visibility: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include

specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #2 for AI Visibility: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #3 for AI Visibility: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #4 for AI Visibility: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Finding #5 for AI Visibility: This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities. This is an extremely long finding that spans multiple lines and contains detailed technical information about the issue discovered during the audit process. It may include specific metrics, URLs, and recommendations that should wrap properly within the PDF column constraints. This text is intentionally verbose to test text wrapping capabilities.

Recommendations:

> Recommendation #1: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.

> Recommendation #2: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.

> Recommendation #3: Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility. Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.

Implement comprehensive schema markup across all listing pages including LocalBusiness, AggregateRating, ItemList, and FAQPage schema types to maximize rich snippet eligibility.

30-DAY DIRECTORY IMPROVEMENT PLAN

Week 1: Foundation & Structure

- ☐ Audit and fix URL structure for consistency
- ☐ Implement or fix BreadcrumbList schema
- ☐ Ensure all listings have canonical tags
- ☐ Block filter/sort URLs in robots.txt
- ☐ Submit updated sitemap with all listing pages

Week 2: Schema & On-Page

- ☐ Implement LocalBusiness schema on all listing pages
- ☐ Add ItemList schema to category pages
- ☐ Ensure unique title tags (50-60 chars) per page
- ☐ Write unique meta descriptions (150-160 chars)
- ☐ Fix heading hierarchy (single H1, structured H2/H3)

Week 3: Content Quality

- ☐ Expand thin listing descriptions to 300+ words
- ☐ Add/improve review and rating system
- ☐ Create 'Related Listings' sections
- ☐ Start blog with 'Best [Category] in [Location]' posts
- ☐ Add visible dates (last updated) to listings

Week 4: Authority & Growth

- ☐ Add About, Contact, Privacy, and Terms pages
- ☐ Implement social sharing and links
- ☐ Create 'How We Rate' methodology page
- ☐ Begin outreach for backlinks and partnerships
- ☐ Set up Google Search Console monitoring

DIRECTORY-SPECIFIC RECOMMENDATIONS

- **Listing Page Template:** Ensure every listing has: name, description (300+ words), address, phone, hours, images, categories, reviews, and external website link.
- **Category Hub Strategy:** Create pillar category pages with unique intro content, filtering options, and internal links to subcategories and top listings.

- **Location Pages:** If geo-relevant, create city/state landing pages targeting '[category] in [city]' searches.
- **User-Generated Content:** Encourage and display reviews - this creates unique content and builds trust with users and search engines.
- **Schema for Rich Results:** LocalBusiness, AggregateRating, ItemList, and FAQPage schemas can earn rich snippets in search results.
- **Programmatic SEO:** Use templates + unique data points to generate valuable pages at scale without thin content issues.
